

Subject: Certification of Conformance

To Whom It May Concern:

This is to certify that all Ohaus scales and balances are calibrated before leaving our manufacturing facility and checked to insure that they conform to the specifications outlined in our catalog and instruction manual. Local environment, i.e. gravitation, may influence the calibration upon receipt by the end user. Calibration should be verified in the field before the first use of the balance. Refer to the Instruction Manual.

Sincerely,

Maddy Hoffmann
